OBJECTIVE

Flutter Mobile Application Developer with a Computer Science degree and **2+ years** of hands-on, project-based experience in building cross-platform mobile applications. Specialized in developing scalable, high-performance solutions with clean architecture, modern state management, and seamless UI/UX. Focused on using modern technologies to build reliable, user-friendly applications that create real business impact.

TOOLS & SKILLS

- **Tools :** Android Studio, VS Code, Git, GitHub, Figma
- **Languages & Frameworks :** Dart, Flutter
- **Backend & Databases :** Firebase, Supabase, Cloudinary
- **Other Skills :** REST API Integration, Stripe Payment Integration, OneSignal, MVVM, State Management (Provider, GetX, Riverpod), UI/UX Design, JSON Handling

PROJECTS

KistFlow — Installment App

- Designed and developed a mobile solution to manage installment-based sales, customer records, and payment tracking.
- Automated installment calculations, due schedules, and overdue detection to improve financial accuracy.
- Implemented real-time dashboards for payment status tracking and business analytics.

Tech Stack: Flutter, Dart, Riverpod, MVVM, Firebase, Cloudinary

MosquePro — Mosque Management System

- Developed a scalable mobile solution for mosque operations and community engagement.
- Implemented secure token-based onboarding and role-based access control.
- Enabled real-time updates, push notifications, and API-driven prayer timings.

Tech Stack: Flutter, Dart, Firebase, Provider, REST APIs, Cloudinary, OneSignal
